PROFILE

Dynamic individual with hands-on experience in front-end and back-end web development. Looking for a growth opportunity within a stable company with a professional development environment.

EXPERIENCE

FRONT END / BACK END DEVELOPER, HORN GROUP — 12/2009 - PRESENT

Serve as the only front-end developer for all web projects. All back-end work is done in PHP. Working closely with Senior Engineers on new web development and management of various projects. (PHP, MySQL, Javascript, JQuery, Ajax, JSP, JSTL, XSLT, CSS, XHTML)

DEVELOPER, FLUID HTML — 7/2009 – 9/2009

Fluid HTML is a new HTML markup language that is currently in development. I was hired to help the team build useful real world examples and tutorials of FHTML, in hopes to convey web developers to take interest in the language. At the same time I play a major role in improving FHTML syntax and logic to make the transition from CSS and XHTML into FHTML as smooth as possible.

FRONT END / BACK END DEVELOPER, MTV NETWORKS (VH1) — 5/2008 – 7/2009

Operated as the sole front end developer for all VH1 Blogs (Scandalist, TheFABlife, Fashion & Style Blog, VH1 Blog, American Idol Blog, Oscars Blog), some blogs averaging out half a million monthly hits. Played a major role in coding the newly redesigned VH1 Homepage. (PHP, MySQL, JHTML, Dynamo, Ajax, JQuery, XSLT, CSS, XHTML). Proficient in web production (XHTML, CSS, Javascript, cross-platform cross-browser compatibility). Backend work mostly involved customizing the Wordpress blogging platform.

FRONT END / BACK END DEVELOPER, HORN GROUP — 2005 - 2008

Served as the primary front end developer for all web projects (PHP, MySQL, Java, Ajax, XSLT, Actionscript, CSS, XHTML). Back end work coded in PHP. Designed and developed front end side of various content management web applications. Worked closely with Senior Engineers on new web development and management of various projects.

FRONT END DEVELOPER, WEB/PRINT DESIGNER, ECOMMERCEPARTNERS — 2004 - 2005

Primary responsibilities consisted of maintaining all web projects and doing web production for newly designed projects. Secondary responsibilities included designing for print and web and producing marketing material.

EDUCATION

Brooklyn College, New York — Bachelors in Computer Science, 2005

SKILLS

Skill set consists of : PHP, MySQL, Javascript (jQuery, Scriptalicious, have the ability to write JS code without use of any libraries), CSS, XHTML, XSLT, XML, JSTL, JSP, UNIX, JHTML, Dynamo, Actionscript, , background in C programming, very comfortable working in Mac or PC environments.
